EDUCATION

UNIVERSITY OF CALIFORNIA, LOS ANGELES

Los Angeles, CA

Bachelor of Science, Computer Science

Expected June 2030

- **Relevant Coursework:** Data Structures and Algorithms (C++), Computer Organization and Architecture, Discrete Mathematics, Linear Algebra, Differential Equations

FOOTHILL HIGH SCHOOL

Pleasanton, CA

High School Diploma

Graduated May 2026

- **Relevant Coursework:** Multivariable Calculus, AP Calculus BC, AP Computer Science A, AP Statistics, Honors Digital Electronics, Honors Computer Integrated Manufacturing, Honors Principles of Engineering
- **Leadership:** CS Club Co-President, FalconHacks Co-President, Science Olympiad Engineering Captain, Varsity Badminton Captain

EXPERIENCE

Y Combinator Startup School

San Francisco, CA

Selected Participant

Jul 2026

- Selected from a pool of ~30,000 builders to attend Y Combinator's AI Startup School in San Francisco
- Learned from leading figures in AI and technology, including Jensen Huang, Sam Altman, and Jeff Dean
- Received \$25,000+ in AI credits, currently being used to build and develop ongoing personal AI projects

DeWeese Lab, University of California, Berkeley

Berkeley, CA

Research Intern

Mar 2025 – Jan 2026

- Developed an interpretable monocular depth estimation model using patch-based polynomial regression
- Achieved ~0.05 m² average MSE on NYU Depth V2 subset, remaining interpretable unlike CNN baselines
- Authored research paper under review for publication in the International Journal of High School Research

SynergyPlus

Pleasanton, CA

Software Engineering Intern

Aug 2025 – Dec 2025

- Helped architect and deploy a full-stack gradebook and grade-calculation platform with React, HTML/CSS
- Integrated the StudentVue API to automatically sync grades with existing school district grading software
- Expanded the platform's user base to serve 4,500+ students and teachers across multiple school districts

PROJECTS

RepoSpace – AI Repository Intelligence System | Google AI Agents Capstone Challenge

Jul 2026

- Built a modular agentic framework using Google Gemini and Agent Development Kit to ingest GitHub repos
- Enabled repository indexing, semantic code retrieval, and project structure analysis for developer inquiries
- Incorporated RAG and Model Context Protocol (MCP) to deliver context-aware implementation assistance

Autonomous Driving Algorithm | UC Berkeley ROAR Competition

Aug 2025

- Developed an open-source autonomous control algorithm using PID and a waypoint-following pipeline
- Generated steering correction and throttle/braking control commands from the real-time vehicle environment
- Received 4th place award after rigorous evaluation of the algorithm's performance in the CARLA simulator

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, HTML/CSS
- **Tools & Frameworks:** PyTorch, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV, React, Jupyter, Git/GitHub, Google ADK, Google Antigravity, Claude Code, CAD Design
- **Certifications:** Google AI Agents
